What a difference a week makes! Markets have rallied as I have predicted. We are trading weather forecasts, and they can change hourly. I want to caution farmers from getting too bullish here. Markets will turn down to harvest lows quicker than you can imagine. Be prepared and don't be greedy. If you are holding, more than 10% of your Old Crop, you would be wise to sell the extra at these prices for Corn and Soybeans.

Soybeans failed to make a new six month high on their rally today, but November did breakout and close above the magic \$6.32. This should give us a little more to this rally. Maybe we can get our \$6.49 hit versus November for our next sale. Finish up Old Crop Sales at \$6.23 versus August Futures.

December Corn Futures hit \$2.72 today (FC/CC \$2.73). July Futures failed to hit our sales level at \$2.47 by a quarter cent. Finish up sales when September Futures hits \$2.57.

Let me know how your Wheat crops came in. I am adding a new order to sell some at a higher level.

Especially in the next couple of weeks, if you have any questions, please call me for my current thoughts, or your particular situation.

Keep me informed of conditions and crop prospects in your area.
