Page one

E-85 has higher octane and that is why it is used as a gasoline additive. In order for vehicles to get better gas mileage instead of worse than petroleum, the vehicles need to be turbo charged to take advantage of the higher octane. This is why the Indy cars, which are turbo charged, were getting better fuel economy.

Weather rules right now. Some models show rain for Saturday across the Midwest, some show for Tuesday, some show no rain for the next week. My interpretation of weather maps tells me that the omega high is shifting and that should bring rain in either this weekend or by Tuesday. Remember that this is a Futures market and the traders are looking a week or two out. It will always be the most bullish at the top of the market.

If your elevator puts their orders in for the night sessions, then you were filled on your order to finish up sales in Old Crop Soybeans on Sunday night. The day session on Monday got within two cents of out target. Likewise, you were filled in the night session to get to 40% sold for New Crop Fall delivery. The Monday day session got within ½ cent of getting that order filled. World wide palm oil prices has fallen 12% in 24 hours. This has pulled Soy Oil prices down also. This is putting more bearishness into the Soybean complex. Plus, since we have had this rally, the economics for South America have allowed them to plan to put more Bean acres in a few months. All of this increases the odds of Soybeans going down in the short term. I am getting a Cash Grain Indicator Sell Signal for Old Crop and New Crop Soybeans on a Daily, Weekly, and Monthly tonight. Therefore, if you still have Old Crop Soybeans left, it's time to finish sales. For New Crop Soybeans for Fall delivery or for a time that works for you, please get to 40% sold, if you haven't gotten your order filled yet.

Corn has continued to rallied because of the dry weather forecasts. Contrary to my previous thinking, I am picking up across the nation that more Corn was actually planted than intended earlier. This will put pressure on the market when we find that out on June 29 with the Stocks report. So we need to be looking for a top in the Corn market before that. I am getting my first daily Cash Grain Indicator Sell Signal for Old Crop Corn since the end of February when we put the top in the Corn markets. So sell another 5% of Old Crop Corn to bring you to 90% sold on tomorrow's opening. If you are holding basis contracts, lock in the futures price on tomorrow's opening. I am also getting a Cash Grain Indicator Sell Signal for New Crop Corn, so add another 5% to bring you up 40% sold on the opening tomorrow.

Wheat prices have gone higher with some of the Wheat crop yields a little disappointing and some having quality issues. I am still waiting until after harvest before adding to sales.

Reserve the following for a barbeque and market round table discussion: Friday evening, August 17 in Springfield, IL, Friday evening, August 24 in Manteno, IL. I am still looking for an Iowa farm yard centrally located to do the same on Saturday afternoon or evening, August 18. Please give me a call if you are willing to host. I'll supply the catered food.

If you are looking for a place to invest money, we have discretionary accounts available through Attain Capital. Just call for info. Also, we produce nightly reports for hedging and our investment thoughts for those who have Cadent futures accounts with us. Let us know what you need.

OLD CROP 2006 SOYBEANS: We have finished sales. Finish on tomorrow's opening if you are not done.

OLD CROP 2006 CORN: We have sold 85%. Sell 5% on tomorrow's opening. Sell 5% at \$4.29 & \$4.61 versus July. That's 35 & 67 cents away.

CURRENT CROP 2007 WHEAT: We have sold 50%. No additional recommendations.

NEW CROP 2007 SOYBEANS: We have sold 40%. If you are not 40% sold, catch up by selling on tomorrow's opening. Sell 5% at \$8.99 versus November. That's 39 cents away.

NEW CROP 2007 CORN: We have sold 35%. Sell 5% on tomorrow's opening.

CURRENT CROP 2008 WHEAT: We have sold 10%. No additional recommendations.

RED CROP 2008 SOYBEANS: No additional recommendations.

RED CROP 2008 CORN: We have sold 10%. No additional recommendations.
